

Compass Underwriting, is very pleased to have supported Race for Life in their continuing endeavours to raise funds for Cancer Research UK.

A group of Compass employees took part in the 2008 Race for Life event on the 1st June in the City of London, which had over 7,500 participants.

Regardless of whether they ran or walked their way round the 5km course as it meandered its way through the City of London - they all thoroughly enjoyed themselves and were all very proud of their support and participation for such a worthwhile cause.

As one of the UK's leading accident and health underwriting agencies Compass is dedicated to supporting such activities, which promote research for better health.

NOTES TO EDITORS:

Since its creation in 1990, Compass Underwriting is now one of the UK's largest independent Accident and Health underwriting agencies with some 500,000 Insureds via 7 underwriting facilities including AXA Insurance UK plc and Sterling Life Limited. Compass specialises in Accident & Health product development for personal accident, income-protection, critical illness, term life, corporate dental, and travel, as well as marketing and full administration including underwriting, claims, policy issuance, accounting and reports.

Race for Life is Cancer Research UK's flagship event that has grown to become the UK's largest women-only fundraising event. Cancer Research UK's Race for Life began in 1994 to raise funds for the charity's pioneering work to help beat cancer. It is now the biggest women-only fundraising event in the UK, with every pound raised in sponsorship going towards furthering our ground-breaking work. This includes the scientists, doctors and nurses who work tirelessly to find new treatments for the disease.

To date, 3.4 million women have raised over £200 million for Cancer Research UK, the leading funder of cancer research in the UK. In 2007 we brought together 665,000 women to walk, jog or run 5k to raise £40 million pounds for Cancer Research UK - the world's leading independent organisation dedicated to cancer research.
